

Features

- High Resolution, High Performance 4 Channel DVR SVR-470
- Equipped with an 3.5" LCD monitor, this SVR-470 is an ideal monitoring system for small businesses; it is cost-effective and space-efficient to maximize convenience. This DVR also supports a dual display when used in conjunction with an extra monitor. Embedded with H.264 high-performance image compression, this DVR provides high-quality for both recording and playing video. The default 320 GB HDD guarantees at least 1 month worth of data storage without data removal for continuous, long-term recording. In addition, network monitoring options are provided to help small business owners monitor their stores from home or other remote locations. This SVR-470 also provides various digital features. Even CCTV equipment beginners can easily use the intuitive GUI to record and search videos, and back up data using the USB port on the DVR front panel.
- Self-contained front LCD for easy monitoring
- H.264 high performance image compression
- 4 channels & 120fps real-time recording
- 320GB high storage capacity
- Excellent Remote Network Transfer
- SVM-S1 Centralized Management Software

- Various Digital Features like User Friendly GUI, Front USB for Convenient Back up
